

IN THE CLAIMS

Please find below a complete listing of presently pending claims with status identifiers. This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently Amended) A tissue product comprising:
a base sheet comprising pulp fibers, the base sheet including a first side and a second and opposite side,
a topical composition applied to at least one side of the base sheet, the composition comprising a chemical additive, the chemical additive comprising an anti-acne additive, an anti-microbial additive, an anti-fungal additive, an antiseptic additive, an antioxidant, a cosmetic astringent, a drug astringent, a deodorant, an external analgesics, a fragrance, a humectant, a moisturizing agent, an opacifier, a skin conditioning agent, a skin exfoliating agent, a skin protectant, a sunscreen, a strength agent, a debonder, a softener, or mixtures thereof, the composition being ~~applied to~~ printed on the sheet in the form of discrete droplets, the droplets having a diameter of less than about 3 millimeters, at least 75% of the composition by weight being located at substantially the surface of the sheet.
2. (Original) A tissue product as defined in claim 1, wherein the droplets have a diameter of less than about 200 microns.
3. (Original) A tissue product as defined in claim 1, wherein the droplets have a diameter of less than about 100 microns.
4. (Original) A tissue product as defined in claim 1, wherein the composition is substantially present on the surface in an amount greater than about 90% by weight.
5. (Original) A tissue product as defined in claim 1, wherein the droplets are present on the base sheet in a machine direction at a density of from about 5 droplets per inch to about 100 droplets per inch.
6. (Original) A tissue product as defined in claim 1, wherein the droplets

are present on the base sheet in a machine direction at a density of at least 100 droplets per inch.

7. (Original) A tissue product as defined in claim 1, wherein the topical composition is applied to the base sheet at an add-on rate of from about 0.001% to about 10% by weight.

8. (Original) A tissue product as defined in claim 1, wherein the tissue product has a bulk of greater than about 2 cc/g.

9. (Original) A tissue product as defined in claim 1, wherein the topical composition is applied to the base sheet according to a discernible and repetitive pattern.

10. (Original) A tissue product as defined in claim 9, wherein the pattern comprises a plurality of columns.

11. (Original) A tissue product as defined in claim 1, wherein the topical composition covers at least 50% of the surface area of the side of the sheet.

12. (Original) A tissue product as defined in claim 1, wherein the topical composition covers at least 90% of the surface area of the side of the sheet.

13. (Original) A tissue product as defined in claim 5, wherein the droplets are present on the base sheet in a cross-machine direction also at a density of from about 5 droplets per inch to about 100 droplets per inch.

14. (Currently Amended) A tissue product comprising:
a base sheet comprising pulp fibers, the base sheet including a first side and a second and opposite side,
two or more distinct topical compositions ~~applied to~~ printed onto at least one side of the base sheet, the compositions comprising chemical additives, at least one of the chemical additives comprising an anti-acne additive, an anti-microbial additive, an anti-fungal additive, an antiseptic additive, an antioxidant, a cosmetic astringent, a drug astringent, a deodorant, an external analgesics, a fragrance, a humectant, a moisturizing agent, an opacifier, a skin conditioning

agent, a skin exfoliating agent, a skin protectant, a sunscreen, a strength agent, a debonder, a softener, or mixtures thereof, the compositions being applied to the sheet in the form of discrete droplets, the droplets having a diameter of less than about 3 millimeters and wherein the compositions are located in discrete substantially non-overlapping regions of the sheet.

15. (Original) A tissue product as defined in claim 14, wherein the droplets have a diameter of less than about 200 microns.

16. (Original) A tissue product as defined in claim 14, wherein the droplets have a diameter of less than about 100 microns.

17. (Original) A tissue product as defined in claim 14, wherein at least one of the compositions is substantially present on the surface in an amount greater than about 75% by weight.

18. (Original) A tissue product as defined in claim 14, wherein the droplets are present on the base sheet in a machine direction at a density of from about 5 droplets per inch to about 100 droplets per inch.

19. (Original) A tissue product as defined in claim 14, wherein the droplets are present on the base sheet in a machine direction at a density of at least 100 droplets per inch.

20. (Original) A tissue product as defined in claim 14, wherein the topical compositions are applied to the base sheet at an add-on rate of from about 0.001% to about 10% by weight.

21. (Original) A tissue product as defined in claim 14, wherein the tissue product has a bulk of greater than about 2 cc/g.

22. (Original) A tissue product as defined in claim 14, wherein each of the topical compositions is applied to the base sheet according to a repetitive pattern.

23. (Original) A tissue product as defined in claim 22, wherein each of the patterns comprises a plurality of columns.

24. (Original) A tissue product as defined in claim 22, wherein at least one

of the compositions is present in as a continuous pattern across the machine and cross directions of the sheet and wherein at least one of the other compositions is present in a discontinuous pattern across the machine and cross directions of the sheet.

25. (Original) The tissue product as defined in claim 24, wherein less than 10% of the area of continuously treated region overlaps with the discontinuously treated regions of the tissue sheet.

26. (Original) The tissue product as defined in claim 24, wherein less than 5% of the area of continuously treated region overlaps with the discontinuously treated regions of the tissue sheet.

27. (Original) The tissue product as defined in claim 24, wherein about 0% of the area of continuously treated region overlaps with the discontinuously treated regions of the tissue sheet.

28. (Original) A tissue product as defined in claim 14, wherein the topical compositions cover at least 50% of the surface area of the side of the sheet.

29. (Original) A tissue product as defined in claim 14, wherein the topical compositions cover at least 70% of the surface area of the side of the sheet.

30. (New) A tissue product as defined in claim 1, wherein the chemical additive comprises a polysiloxane.

31. (New) A tissue product as defined in claim 30, wherein the polysiloxane is contained in an emulsion.

32. (New) A tissue product as defined in claim 30, wherein the polysiloxane is hydrophobic.

33. (New) A tissue product as defined in claim 30, wherein the polysiloxane is hydrophilic.

34. (New) A tissue product as defined in claim 14, wherein at least one of the chemical additives comprises a polysiloxane.

35. (New) A tissue product as defined in claim 34, wherein the polysiloxane is hydrophobic.

36. (New) A tissue product as defined in claim 34, wherein the polysiloxane is hydrophilic.
